SOCIETY

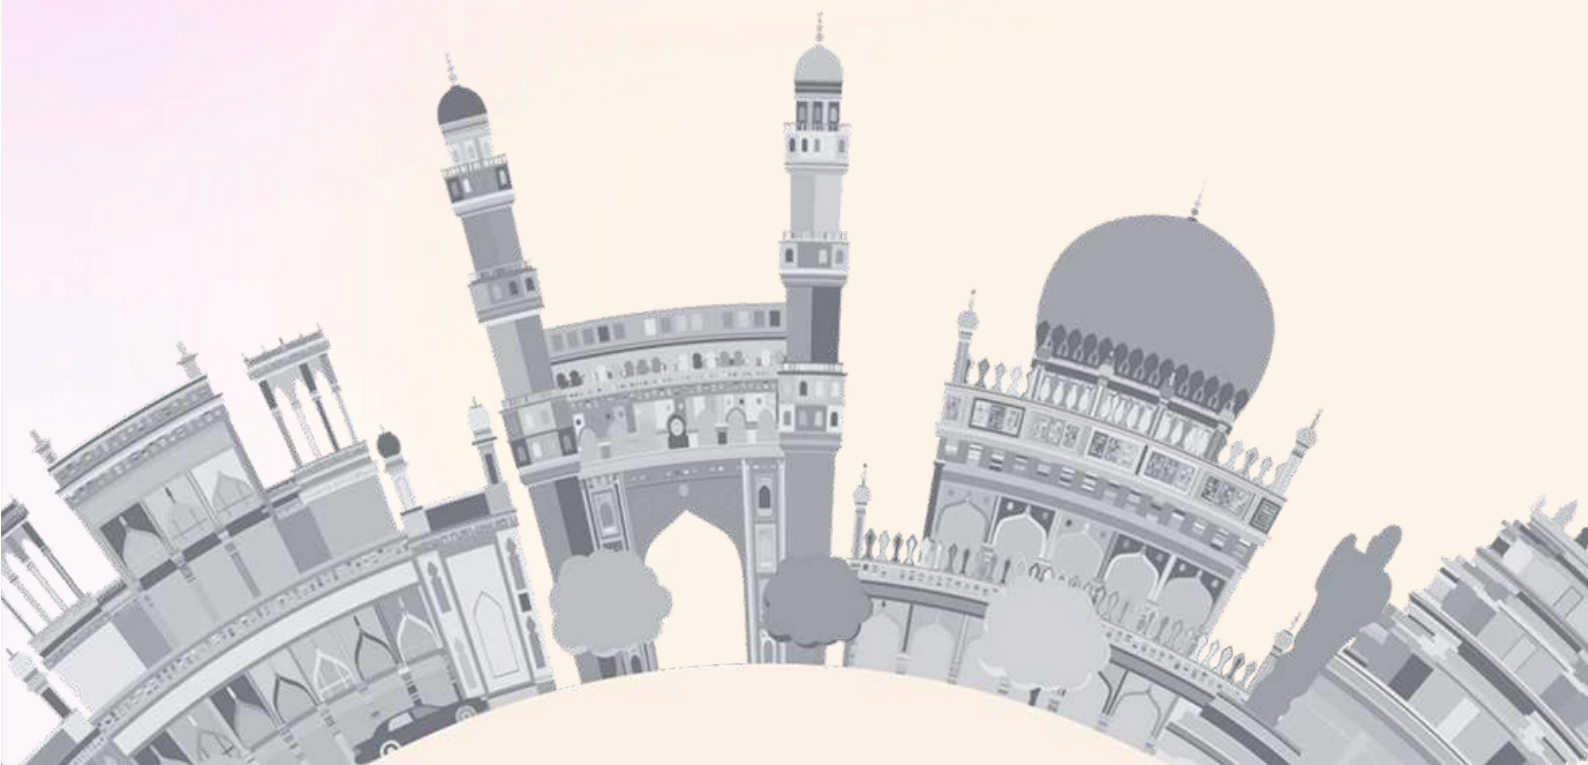

Presents

*Ferty*gyaan

*A Science-first International Conference
on Reproductive Medicine*

Date : 11th & 12th October, 2025

**Location : Marriott Hotel & Convention Centre,
Hyderabad**

WHY FERTYGYAAN?

Infertility is no longer a niche concern-it is an integral part of everyday OB-GYN practice. As fertility challenges become more complex and prevalent, gynecologists are at the forefront of transforming reproductive care. They are uniquely positioned to lead the charge in how we approach infertility, ensuring that both new and established treatment protocols are applied effectively and empathetically.

Fertygyaan - A Science First, International Conference on Reproductive Medicine, is designed to equip gynecologists with the latest scientific tools, practical clinical frameworks, and cross-disciplinary knowledge, bridging the gap between cutting-edge research and everyday patient care. This conference offers a unique platform for gynecologists to stay ahead of the curve in an ever-evolving field.

Through Fertygyaan, we aim to:

- Provide access to evidence-based fertility insights tailored to the needs of practicing gynecologists.
- Decode new-age fertility science in a clinical context, making complex research accessible and applicable to real-world patient care.
- Explore diagnostic dilemmas and patient timelines, helping practitioners navigate the complexities of fertility issues and enhance treatment outcomes.
- Foster connections with fertility specialists, embryologists, and researchers, facilitating collaboration and knowledge-sharing across disciplines.

At Fertygyaan, we're building a space where science meets experience, and where gynecologists are not just part of the fertility conversation, but central to it. Together, we will drive the future of reproductive care, ensuring better outcomes and a deeper understanding of the fertility journey.
